

Minh Vu (Mike)

Full Stack Software Engineer | 📍 Wollongong | ☎ 0483 825 042 | ✉ minhvu2614.work@gmail.com
🌐 Portfolio | 🌐 LinkedIn

PROFESSIONAL SUMMARY

Dynamic **Full Stack Software Engineer** with a proven ability to design and develop robust, high-performance applications using **Java (Spring Boot)**, **Node.js**, and **Python (FastAPI)**. Experienced in building scalable backend systems, delivering responsive frontends with **React and TypeScript**, and integrating AI-driven features using frameworks such as TensorFlow and PyTorch. Adept at working across the full development lifecycle in **Agile** teams, with a strong focus on clean architecture, Object-Oriented Design, and seamless system integration.

EDUCATION

University of Wollongong

Bachelor of Computer Science — Major in Big Data and AI

Jul 2022 – Jul 2025

Wollongong, NSW

PROFESSIONAL EXPERIENCE

Sample Assist

AI Engineer Intern | [demo video](#)

Sept 2024 – Jun 2025

Wollongong, NSW

- **Automated 10M+ patient records (+80% efficiency)** by fine-tuning PaddleOCR and deploying scalable inference pipelines.
- **Overcame data scarcity** by building a GAN-based synthetic dataset pipeline, maintaining high model accuracy.
- **Led end-to-end delivery** from stakeholder requirements to production APIs using Python (FastAPI) and OpenCV.

PERSONAL PROJECTS

Online Ordering System (Full-Stack Java EE)

Lead Developer | [demo video](#)

Jan 2025 – May 2025

Hanoi, Vietnam

- **Boosted order throughput by 50% and cut manual ops by 30%** by architecting an end-to-end management platform with a Tomcat-deployed backend, normalized MySQL schema, and strict MVC patterns.

Todo Bot (Full-Stack MERN)

Full Stack Software Engineer | [demo](#)

Apr 2026 – Present

Wollongong, NSW

- **Strategically bridged the gap between Java and MERN ecosystems** by building a task app with MongoDB persistence and a shadcn/ui frontend; currently architecting a RAG-based AI assistant for smart scheduling.

ONGOING PROJECTS

Gong Soccer

Full Stack Software Engineer

Mar 2026 – Present

Wollongong, NSW

- **Eliminated manual league administration overhead** via a team management platform featuring secure JWT/RBAC authentication, a modular REST API, and a type-safe React/TypeScript frontend.
- **Optimized data reliability** by designing a high-performance PostgreSQL schema using JPA/Hibernate to automate complex player registration and team captain workflows.

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, Node.js, Python, JavaScript

Backend: Spring Boot, ExpressJS, Hibernate/JPA, Spring Security (JWT), RESTful Web Services, JSP, JDBC

Cloud & DevOps: AWS (ECS, S3, IAM), Docker, Maven, Git, GitHub, Tomcat

Databases: PostgreSQL, MySQL, MongoDB

Frontend: React, Tailwind CSS, HTML5, CSS3, Shadcn/ui
